

---

The AD Mirror Systems platforms were designed to assist individuals with a variety of needs. There are no knobs, levers or fasteners to turn, so even individuals with limited dexterity can use the mirror system independently.

Some of the many uses include:

- Aiding individuals with an Ostomy or Colostomy in cleaning or changing their appliance.
- Aiding individuals with Diabetes or Amputees in inspecting and cleaning their skin or wounds.
- Aiding individuals with Spinal Cord Injuries or Disorders in performing personal care activities.
- Any activity that requires a third hand to make life a little easier to perform routine daily tasks.

AD Mirror Systems are the brainchild of the lead designer Ron Dolar. He is a medical needs patient himself and aspires to enhance the lives of those with health care needs that desire greater independence in their lives.

**Greater Independence** for a life lived with **Fewer Limitations**

---

### AD Mirror Systems:

- **Easy to both assemble and to disassemble.**
- **Adjust both the mirror height and viewing position to meet your needs.**
- **All of the sections slip together without tightening or loosening knobs, levers or fasteners.**
- **Systems can be used standing, seated or lying down.**
- **Features stainless steel construction that is durable & hygienic.**
- **Once the System is adjusted both hands are free to be used to perform the tasks required to maintain your independence.**

-

## Home Mirror System

Primarily designed for home use. Our Home Mirror System is made with a larger diameter stainless steel tubing, and is the most stable mirror platform system.

The Home Mirror System includes our horseshoe base, three interchangeable mast sections (14", 16" 18"), one branch section and a sealed mirror with 41.25 square inches of viewing area. This unit was designed to work in a standing, sitting or lying down positions .

## Trooper Mirror System

This System is designed for wherever your lifestyle takes you. It's lighter, stainless steel wire design makes the system easily portable in a backpack and great for both home and travel use..

The Trooper Mirror System includes our lightweight horseshoe base, three interchangeable mast sections (14", 16" 18"), one branch section and a sealed mirror with 41.25 square inches of viewing area. This unit was designed to work in a sitting or lying down positions.

## Foot Inspection Mirror

This System is designed primarily for diabetic and amputee use, focusing on skin or wound inspections on the feet. It's lighter stainless steel wire design also makes it great for home and travel use.

The Foot Inspection Mirror System includes our lightweight stainless steel base, one lightweight stainless steel branch section and a sealed stainless steel mirror with 41.25 square inches of viewing area.

**MIRROR PLATFORM:** All of our AD Mirror Systems Platforms are designed to provide the user unassisted, hands-free body viewing flexibility. The systems are adjustable in height and or angle without knobs or levers to tighten or loosen. The Systems easily adjust to provide a clear view of most body areas. All materials used to build our AD Mirror Systems are high-quality stainless steel, making them easy to clean and maintain and ready to use in any room including the bathroom.
